

We do blends.

Because it's hard to pick favourites.

Extend your design possibilities with clay brick blends.

Any way you stack it, the Fusion Collection is all about creating a blended look on the wall with a mix of existing colours and textures from our Clay Brick Collections. We've worked with leading architects and designers to come up with an introductory Fusion Collection of six creative blends shown here. However, we can work with you to create your own custom blends. Then we'll selectively stack and ship the pallets with the bricks already mixed according to the blend percentage formula, ready for the bricklayer.

WHY SHAW BRICK:

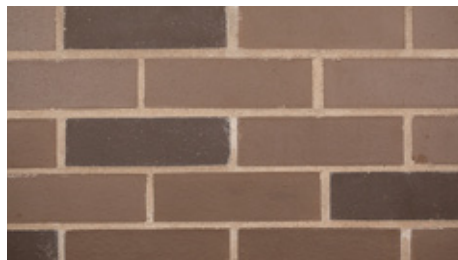

- Lowest absorption rates provide superior freeze and thaw resilience
- 156 years of brick making history
- Lifetime warranty on all our clay brick products
- Hand sorting of all bricks maximizes quality control
