

## LANDSCAPE STEPS

### **The smart alternative to natural stone steps**

Landscape Steps (also known as K-Block Steps) from Shaw Brick are the smart alternative to natural stone steps. Known for their strength, durability and beautiful representation of real stone, they are a great solution for any landscape stone project.

Made of high strength concrete these landscape products are strong and durable but much lighter than natural stone. They are a great alternative to using natural stone steps and boulders.

Landscape stone steps come in 4', 5' and 6' lengths. We also offer a hollow core 4' version. All are available in two popular colour ranges: Granite Blend and Earth Blend. The tops and bottoms have a smooth finish, while the sides have an attractive natural stone texture.

Drop into a [Shaw Retail Centre](#) or one of our [independent dealers](#) to learn more about making your project be the best it can be.
