

MAX 57

A new, longer Clay Brick that's big on benefits and style

In response to industry demand and design trends, Shaw Brick has developed a new, longer brick called MAX 57. At 257 mm in length, this brick is about 25% longer than our usual 190 mm clay bricks. It has a more linear look on the wall and installs faster, coursing out with less cutting and labour cost.

Produced with our Tapestry finish, that sleek new brick is a perfect look for some of the cool new neutral colour ranges MAX 57 comes in - like Port Morien, Cape Smokey, White Point and Platinum. Equally so, it's giving some of our older colour ranges new life, like Red and Red Flashed.

Get MAX 57 in any number of Shaw Brick colours

But, in reality, what MAX 57 really represents, is your opportunity to order almost any colour range of our Clay Brick in the new MAX 57 size. The pros at one of our [Shaw Retail Centres](#) can fill you in on this exciting option.

Our latest innovation in Clay Brick

MAX 57 is just one of the latest innovations our research and development team has been up to. And, because we've been making high-quality bricks since 1861, there have been many innovations along the way.

Manufactured right here in Atlantic Canada, Clay Brick from Shaw Brick has been a timeless staple of the construction industry for over 150 years. And, Shaw's Clay Brick is just as desirable now as it was a century and a half ago, thanks to our continuous innovations in product design

and quality.
