

PISA2 & ROMANPISA

Popular and versatile retaining wall blocks

Pisa2 is one of the most versatile and popular retaining wall blocks on the market. The RomanPisa capitalizes on the strength and capability of the Pisa2 system, but it is manufactured using a specialized process that rounds off the edges and corners and gouges the face to give the retaining wall block a worn cobble appearance.

Both of these RisiStone retaining wall block systems are ideal for diverse applications, including straight or curved retaining walls, planters and steps. They offer a perfect way to handle grade changes in any landscape or garden project and can be used to increase usable space in patios, terraces and driveways.

Pisa2 and RomanPisa retaining wall block systems are available in five nature-inspired colours: Chamois Blend, Granite Blend, Mocha Blend, Red Blend and Grey. The systems install with a three-degree setback and include tapered units for curves, corner units and coping units for the top. Visit risistone.com for more information.

Installation is easy, but we can make it easier

Your retaining wall project will be off to a great start when it is built on a foundation of Shaw Brick style, quality and expertise. Drop into a [Shaw Retail Centre](#) or one of our [independent dealers](#) to learn more about making your project be the best it can be.
