

RANDOM WALL STONE

Natural stone, rough and weathered by nature's forces

Rough and weathered, Random Wall Stone from Shaw Brick is partly shaped by countless years of nature's forces. Choosing this landscaping stone instantly transports decades of history into your backyard.

The random size and shape of Random Wall Stone is sure to blend in with your natural surroundings. This natural stone is available in five colour variations of limestone or slate.

There's nothing like the visual effect of natural stone walls

Because it is extracted from quarries, our Random Wall Stone may have some variations in the natural stone shapes and thicknesses. This does require extra time in laying them, but the resulting effect is well worth it.

Get the truly natural stone look in your next garden wall project with Random Wall Stone from Shaw Brick.
