Creativity in patio walls and garden walls is stacked in your favour.

StackStone, is a tapered garden stone system that features self-aligning landscape blocks with a structural interlock – even around tight curves. Both sides of the stone are rock-faced to use for free-standing patio walls or garden walls, attractive edging, and window or tree wells.

StackStone ensures a perfect, durable, tight fit every time. Use it for straight walls or curves and you'll be impressed by the attractive appearance from any angle.
