

# Garden Wall Installation

## SUPPLIES

- Chisel
- Mallet
- Shovel
- Gloves
- Wheelbarrow
- Carpenter's Level
- Stakes & String
- Concrete Adhesive
- Tape Measure
- Safety Glasses
- Gravel

Install your garden wall in a few simple steps. Determine the square feet of your garden wall, then calculate the number of units required to complete your project.

## Step 1

### BASE PREPARATION

Once you have drawn up plans and marked off the site of your garden wall project, dig a trench at least 8" deep by 16" wide by the desired length. Compact gravel in the trench and fill to a depth of 6" to withstand loading on the surface and seasonal frost from below.

## Step 2

### THE FIRST ROW

Lay the first level of blocks on the completed gravel base, making sure the units are level from side to side and front to back. Bury half of the base block.

## Step 3

### ADDITIONAL ROWS

Stack additional rows by staggering the units along the wall to your desired height. Apply adhesive on the last course to adhere to **CAPSTONES**. Then fill your garden wall or planter with soil.
